

# Step 2: Think About My Business Idea

### How to use this document

WA's Individualised Services (WAiS) wrote this information. When you see the words 'we' or 'us', it means WAiS.

We have written this information in an easy to read way.

We use pictures to explain some ideas.

You can ask for help to read this information.

A friend, family member or support person may be able to help you.

# Do you have a good business idea?

You might have a business idea. Now you need to decide if it is a good idea.

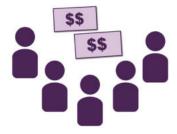

There are a few things you need to think about.

Answering some of these questions might help.

# Do people want to buy what you are selling?

You need to decide if enough people will want to buy your product or service.

Answering these questions can help you decide:

Is your product or service something new?

 Do you know if it is something people want to buy?

 Is your product or service something that other businesses are already selling?

Will people want to buy it from your new business as well?

To decide if people want to buy your product or service, you need to find out more information.

 Talk to your friends, family and people you know and ask them what they think.

- Talk to other people about your business idea. These people can be
  - people who might buy your product or service,
  - other businesses who sell the same product or service.

 Check what people are saying on Facebook and Instagram.

# Where will people want to buy your product or service?

You need to decide where people will want to buy your product or service:

online

from your own shop

from someone else's shop

from home

from markets

# Strengths, Weaknesses, Opportunities and Threats

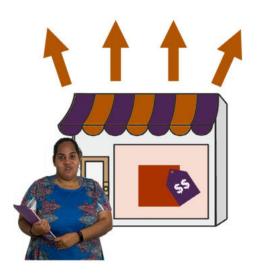

You need to think about **strengths**, **weaknesses**, **opportunities** and **threats** to help decide if you have a good business idea.

Strengths and weaknesses are about you and your business.

Opportunities and threats are about things outside of you and your business.

### **Strengths**

### Weaknesses

Strengths are:

what you and your business are good at.

Weaknesses are:

what you and your business are not good at.

For example, you are very good at talking to people. You can use this to sell your product or service to people.

For example, you are not good at things to do with money. You might need to work with an accountant.

How can you use your strengths to help your business to do well?

What do you need to learn more about or find support to do?

### **Opportunities**

### **Threats**

Opportunities are:

things that could make your business do better.

Threats are:

things that could make your business not do well.

For example, there are low interest rates when borrowing money from a bank. This makes it easier to pay back the money.

For example, rent for a business place is very expensive. You might need to think about working from home or selling

online.

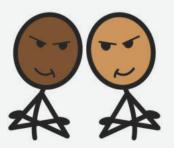

What can you do about opportunities for your business?

What can you do about threats to your business?

# **Competitors**

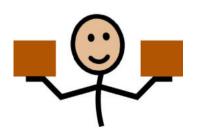

Competitors are businesses that sell products or services that are like yours.

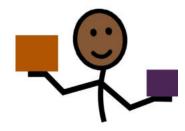

You need to:

• know who your competitors are

 find out what is the same about your business and your competitors

• find out what is different about your business and your competitors.

The questions below will help you find out what is the same or different between your business and your competitors.

??	Questions	Your business	Competitor 1	Competitor 2
	Products or services What is each business selling? How are they the same? How are they different?			
	Who Who will buy the product or service?			
	Place Where is the business selling their products or services? For example: online, markets or from a shop?			

??	Questions	Your business	Competitor 1	Competitor 2
\$	Price What are the prices of the products or services?			
ss \$\$	Paying Can people pay with: credit card, Cash, Paypal, Applepay?			
9 (12) 3	Time Do people have to wait to get what they buy? Can people get what they buy delivered? How long do they wait for delivery?			

# Money

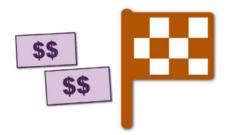

You also need to think about how much money you need for your business.

Answering these questions can help you decide:

When will you make your first sale?

 How much money do you need to start your business?

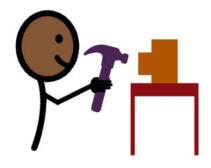

How much money do you need to keep your business open for 3 months?

How much money do you already have?

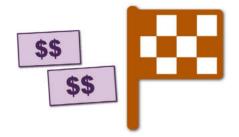

- How much money do you need to find?
  - Where can you get this money?
  - Can you pay this money back?

How much will it cost to make your product or service?

 How much will people pay for your product or service?

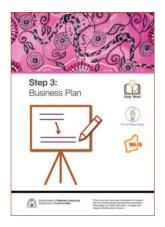

It is important to make sure you have enough money to:

start your business

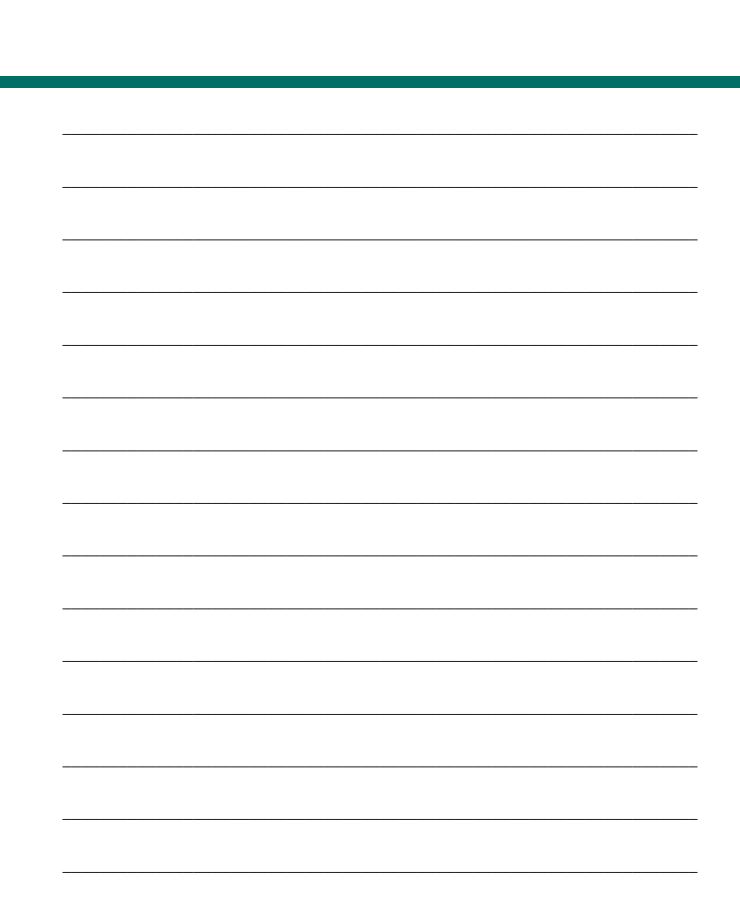

and, keep your business open

Doing a **business plan** will also help to work out if you have a good business idea. WAiS has a business plan you can complete.
